# Certificate of Course Completion

## *Thaïs Parisot*

*has successfully achieved student level credential for completing the* ***Industrial Networking Essentials*** *course.*

*The student was able to proficiently:*

- *Understand hierarchical network design and its role in industrial architectures.*
- *Recognize the importance of standards and protocols for reliable network communications.*
- *Identify and describe network types, components, media, and connections.*
- *Explain the role of multiple network devices in industrial networks.*
- *Explain wireless communication in IT and OT integrated settings.*
- *Describe Ethernet network communication and VLANs.*
- *Explain the importance of effective IP addressing in ensuring efficient network communication.*
- *Explain client access to services and application layer functions.*
- *Describe application layer protocols in the Industrial Internet of Things (IIoT).*
- *Demonstrate the ability to perform basic configurations on Cisco industrial devices.*
